## Compliance inspection report form

Existing Subsurface Sewage Treatment System (\$575)

Doc Type: Compliance and Enforcement

Instructions: Inspection results based on Minnesota Pollution C documentation – additional local requirements may also apply. Fuhttps://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pc				
Inspector must submit completed form to Local Government determination of compliance or noncompliance.	al Unit (LGU) and system owner within All Maginal			
Property information	Local tracking number:			
Parcel ID# or Sec/Twp/Range: 160044000 Loc	al regulatory authority: Becker County			
Property address: 30383 Cty Hwy 26, Rochert, MN 56578	guarding, booker county			
Owner/representative: Dianne Peters	Owner's phone: 218-234-9934			
Brief system description: 1000 gal. tank to 650 gal lift tank to char	nber trench drainfield. 375 sq.ft.			
System status				
System status on date (mm/dd/yyyy): 5/26/2021				
☐ Compliant – Certificate of compliance*	☐ Noncompliant - Notice of noncompliance			
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)	An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.			
*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.	Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance.			
Reason(s) for noncompliance (check all applicable	)			
☐ Impact on public health (Compliance component #1) —	Imminent threat to public health and safety			
☐ Tank integrity (Compliance component #2) — Failing to	protect groundwater			
Other Compliance Conditions (Compliance component	#3) – Imminent threat to public health and safety			
Other Compliance Conditions (Compliance component	#3) – Failing to protect groundwater			
System not abandoned according to Minn. R. 7080.250	00 (Compliance component #3) – Failing to protect groundwater			
☐ Soil separation (Compliance component #5) — Failing to	o protect groundwater			
Comments or recommendations	iance component #4) — Noncompliant - local ordinance applies			
B .161				
Certification				
I hereby certify that all the necessary information has been gathered determination of future system performance has been nor can be me abuse of the system, inadequate maintenance, or future water usage	ade due to unknown conditions during system construction, possible			
By typing my name below, I certify the above statements to be true can be used for the purpose of processing this form.	and correct, to the best of my knowledge, and that this information

Necessary or locally required supporting documentation (must be attached)				
<ul><li>☑ Soil observation logs</li><li>☑ Locally required forms</li><li>☐ Other information (list):</li></ul>	☐ Tank Integrity Assessment ☐ Operating Permit			

1. Impact on public health - Compliance component #1 of 5 Compliance criteria: Attached supporting documentation: System discharges sewage to the ☐ Yes\* ⊠ No Other: ground surface ☐ Not applicable System discharges sewage to drain ☐ Yes ⊠ No tile or surface waters. System causes sewage backup into ☐ Yes' 🖾 No dwelling or establishment. Any "yes" answer above indicates the system is an imminant threat to public health and safety. Describe verification methods and results: 2. Tank integrity – Compliance component #2 of 5 Compliance criteria: Attached supporting documentation: System consists of a seepage pit, 🗌 Yes 🏻 🖾 No ☐ Pumped at time of inspection cesspool, drywell, leaching pit, or other pit? Moores Name of maintenance business: Pumping Sewage tank(s) leak below their ☐ Yes ⊠ No License number of maintenance business: C8175 designed operating depth? Date of maintenance: 5/25/2021 Existing tank integrity assessment (Attach) Date of maintenance (mm/dd/yyyy): If yes, which sewage tank(s) leaks: (must be within three years) Any "yes" answer above indicates the system (See form instructions to ensure assessment complies with is failing to protect groundwater. Minn. R. 7082.0700 subp. 4 B (1)) ☐ Tank is Noncompliant (pumping not necessary – explain below) Other: Tanks Empty Describe verification methods and results:

3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or un	secured?
☐ Yes` ☒ No ☐ Unknown	
3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safe	ety? ☐ Yes     No ☐ Unknow
"Yes to 3a or 3b - System is an imminent threat to public health and safety.	
3c. System is non-protective of ground water for other conditions as determined by inspector?	☐ Yes <sup>*</sup> ☒ No
3d. System not abandoned in accordance with Minn. R. 7080,2500?	☐ Yes' ☒ No
"Yes to 3c or 3d - System is falling to protect groundwater.

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
